Our paper account, weekly report, 2026-10-30 close to 2026-11-06 close, from the lab's sealed nightly record

We are down 7.91% since launch.

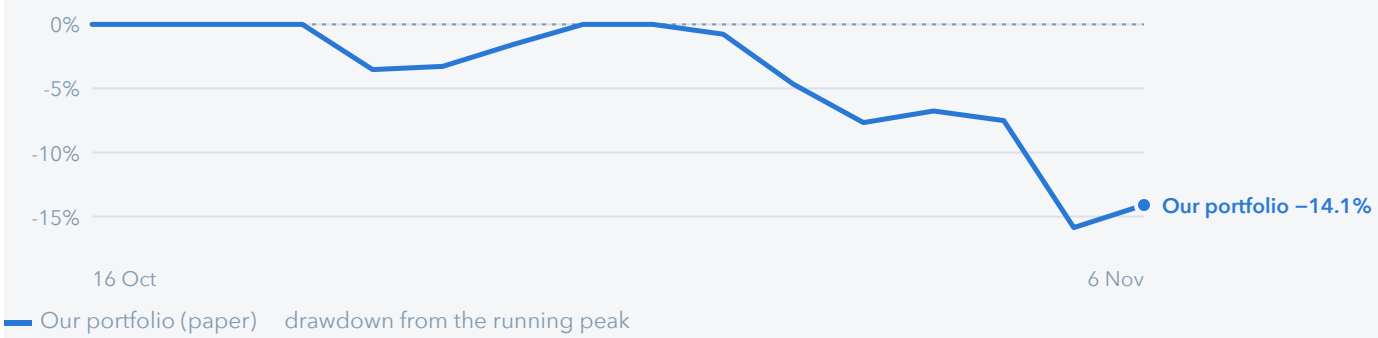

Today we made **+2.11%**. 15 sessions since launch.
This week (5 sessions from the 2026-10-30 close): we **−9.89%**.
Drawdown now **−14.09%**, worst **−15.86%** on 5 Nov; index 92.09.

> Paper trading (simulated money), not proven, hypothetical results, not investment advice. The account trades on a broker's paper engine, whose fills differ from real trading.

We count from launch, the **2026-10-16 close = 100**. The lab's nightly record starts earlier, at the 2026-10-08 close; our numbers are its account index divided by the value at launch. Returns are not annualised; 15 sessions are far too few to judge skill.

Full record from the 8 Oct close: we **−10.07%**, above 6 of 26 funds. Launch is the 16 Oct close.

Against well-known ETFs and quant-style funds

Since launch (the 16 Oct close) we returned **−7.91%**, above **4 of 26** funds, listed here for context. The quant-style funds are listed funds that run the methods of well-known quant firms, as proxies of those styles.

Fund	Group	What	Since launch	We minus fund
TLT	ETF	US Treasuries 20y+	+2.77%	−10.68 pts
IEF	ETF	US Treasuries 7-10y	+1.94%	−9.85 pts

Date	We	Index	We since launch	Drawdown	Seal (seq, hash)
2026-11-06	+2.11%	92.09	−7.91%	−14.09%	pending

Record seal of 2026-11-06: pending (the next nightly run seals it; hash of that day's record file now `5e6dbad6172e0d8d319ae2151548ede81c7b9639460c36fa40f1b72dd8ccf98d`). Latest seal: 2026-11-05, seq 35, hash `03d9421b5c038db4e4c084dd1f05f3354d5e4382ee98dd364ab7385c770fc450`.

The book at the 6 Nov close

79 names and cash 8.1% of the account; market beta 1.677. We do not publish the names.

Stress period (the book replayed)	Book
March 2020 crash	−34.6%
2022 rate shock	−42.8%

What the book would have done in past market falls; not a forecast.

How to check this record

Each night the lab seals that day's record files in an append-only hash chain: each entry holds the hashes of the day's files and the hash of the entry before it. The hash printed for each date lets a reader later confirm that the past numbers did not change. A date is sealed by the nightly run of the next session, so the latest date shows pending.
